

JASON KIM

EXPERIENCE

- CHEFHERO | SOFTWARE ENGINEERING INTERN**
Toronto, ON | May 2017 - Aug. 2017
 - Designed and developed an interactive sign-up page for new customers in **React.js** & **Redux** from scratch, reducing customer onboarding process by 67%
 - Created and modified necessary API endpoints to provide a 26% faster front-end to back-end communication
 - Refactored the company website UI using **React.js** by minifying and componentizing a **Jinja** based legacy codebase
 - Integrated analytics architecture using **Google Analytics**, and a live **Intercom** chatbot to provide interactive user feedback
- ROGUE WAVE SOFTWARE | AUTOMATION DEVELOPER**
Ottawa, ON | Sept. 2016 - Dec. 2016
 - Optimized error triggering points in automation tests written in **C++** and **Python** to decrease its execution time by 23%
 - Developed 7 new virtual test machines of Mac OSX, Solaris, and AIX, increasing test coverage and product stability
 - Architected test failure per-build comparison tool using **TestLink API**, currently in use by 20+ employees

PROJECTS

- EMOTIONTUNES** <https://emotion-tunes-project.herokuapp.com/>
 - A web platform that identifies facial expressions of image URLs and plays a corresponding song based on the emotion detected
 - Built using **Microsoft Cognitive Service (Emotion API)**, **React.js**, **Material UI**, and **Meteor.js**
- #OOTC** <https://ootcdevs.herokuapp.com/>
 - A web platform that shows celebrity outfits, with customizable header where brand logos are added as search filters.
 - Built using **React.js** and **Redux**, with **Meteor.js** back-end support
- MEMORY BOUND**
 - A calendar application with personal log-in credentials and a sound-integrated real-time reminder function, made in **Java**
